

THE GLEICHEN CALL

VOLUME 47 NO. 36

Authorized as second class mail. GLEICHEN, ALBERTA, WEDNESDAY
Post Office Department, Ottawa.

NOVEMBER 24 1954 SUBSCRIPTION \$2.00

Town & District

Mrs. E. MacArthur and Mrs. M. Rousche received word last week of the death of their father, Mr. Franklin Mill, in Prince Edward Island.

Mr. and Mrs. Robt. Barrett and children of Calgary spent the weekend in town visiting relatives. On the return trip to Calgary they were accompanied by Mrs. E. Woods who will visit them for a week or so.

Laurie Brown returned to town Thursday after an absence of several months. He worked for a time at Millett and later was moved to Saffield where he was employed on the Trans-Canada highway. Saturday he said he was busy "pulling a well," which is his specialty.

Mrs. Drunken Chief, an aged Blackfoot Indian died rather suddenly Thursday evening. The funeral took place Saturday morning at the Cluny Mission.

The United Church bazaar will be held next Saturday, November 27th. Home cooking, afternoon tea and the sale of articles will be on the program.

Lou Michael was seriously injured Monday when hit by a car on the street in Calgary. One leg was broken and he suffered other bruises. He is a patient in a hospital in Calgary.

Many people assume that medals and decorations are a basic necessity for armed forces, that they play an important part in the morale of the unit. The men used to comment, jokingly, that "medals come up with rations" to be a line. This may, however, be an outdated view. It does not seem to jibe with a recent report from Ottawa stating that the Department of Veterans Affairs is holding over a million campaign stars and medals not applied for by the veterans of the Second World War. Since 1949 the War Service Records Division has sent out almost two million medals, but it estimates that about 400,000 veterans have not applied for theirs. Canadian disregard for decorations seems, therefore, to be widespread. The unclaimed medals lie in specially constructed storage vaults, a silent testimony to the fact that when they have to, be that their real interests lie elsewhere.

FROM THE FILES OF THE CALL TWENTY YEARS AGO

Mark Anglin of San Francisco is visiting his parents Mr. and Mrs. W. Anglin. Mr. Anglin was accompanied by Fred White who is Mrs. Anglin's brother.

Mr. and Mrs. Service of Mossleigh have moved into town and will reside here permanently.

Joan and Keith Ostrander who have been ill with typhoid fever are now recovering and expect to be around soon.

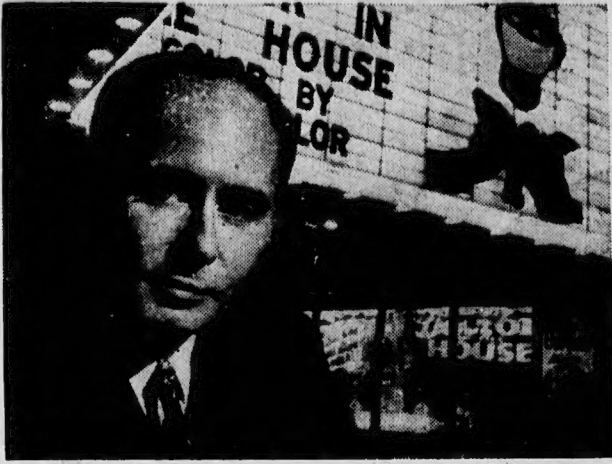

W. Malcom, who for the past two years has been sales man for the Gleichen Flour Mill, is trucking flour in British Columbia and bringing back trucks loads of apples.

J. A. Ramsay has purchased the residence formerly occupied by J. Drinnan and is now moving in to the house.

Cliff Fleury and Carl Johnson have been busy for the past few days painting the inside of the water tank at the top of the water tower. While they are doing this the users of town water are using elbow grease in order to get their water supply. Incidentally this has given Engineer Lester an opportunity to get a large supply of water on hand in the reservoir.

Mr. and Mrs. W. Mooney of Fernie, B.C., spent the weekend in town the guests of Mrs. Menard.

Jack Roberts, the well known Gonner goalie, who played with the Olds last winter, was in town for a few hours Friday. Jack says he expects to play with the Olds

More Canadians follow Clyde Gilmour's reviews of movies than any other film critic in the country. Like a baseball umpire, his opinions are not always shared by the public, but "he calls them

club again this winter.

L. Petric who has been in charge of the 22nd Battery equipment here has been transferred to Calgary. His place has been taken by L. Smith.

Mrs. V. M. Gilbrt returned last week from a month's visit with relatives in eastern Canada and the United States.

Miss Megarry of Cardston was in town Monday renewing old acquaintances. Miss Megarry was a resident of Gleichen for some years before moving to southern Alberta.

Boys digging in the cut banks north west of town have found many arrowheads embedded in the banks. These finds lead people to wonder if at sometime in the distant past a great battle was fought between the Indians.

Mrs. Joe Guttman of Calgary was a visitor to town during the past week.

At a meeting of the Curling Club A. Batts was elected president. R. W. Brown vice-president; H. Myers secretary. The executive appointed consists of J. House, D. McDonald, S. Warne and M. Bolinger. A. F. MacCallum, W. P. Pineau and W. Reid are the schedule committee. H. James, E. Parkin and O. K. Crossett were elected membership committee. D. McDonald, A. Batts, W. Hunter, W. Cook will look after the ice. The membership fee was set at \$5 for men and \$2.50 for ladies and boys under twenty years of age and members living out of town.

CHRISTIAN SCIENCE

The vital importance of detecting the false suggestions of evil and correcting them with the spiritual truth concerning God's unfailing goodness and all-power will be stressed at Christian Science services Sunday. In the Lesson-Sermon entitled "Ancient and Modern Necromancy, alias Mesmerism and Hypnotism, Denounced," the following passage will be read from the Bible (Isaiah 5:20) "Woe unto them that call evil good, and good evil; that put darkness for light, and light for darkness; that put bitter for sweet, and sweet for bitter!" From Science and Health with Key to the Scriptures by Mary Baker Eddy the following passage will be read: "Mind is God. The exterminator of error is the great truth that God, good, is the only mind, and that suppositions opposite of infinite Mind—called devil or evil—is not Mind, is not Truth, but error, without intelligence or reality." The Golden Text is from Romans 8:31; "If God be for us, who can be against us?"

Safety Council

A province wide campaign to promote safer walking and reduce motor accidents, which starts today has aroused special interest, according to officials of the Alberta Safety Council. Preparations for the drive have been undertaken in a number of towns and cities. Mayors of towns and villages and reeves of municipal districts have been urged to give their full support in promoting safety campaign. They have been informed of available supplies of

as he sees them;" if a movie is bad he says so, and if it's good, he's the first to admit it. His views are aired Sunday's on CBC "Critically Speaking," the only serious film review being carried by any network in this continent.

campaign material.

For the first three weeks, the campaign will be directed in particular to pedestrian safety. Walkers will be given full warning of hazards of crossing streets and highways without exercising extreme care to avoid accidents. At this time of the year it is all the more necessary to be extra careful at crossings, especially at night. It is believed that a great deal can be accomplished by this campaign.

For the remainder of the period until after New Year's Day, the campaign will be aimed in particular at motor driving. The theme will be "No Thanks, I'm Driving."

Officials of the ASC point to the numerous accidents and fatalities caused by drinking drivers during the Yuletide period. If drivers refuse to accept intoxicants the alarming toll in this period will be sharply reduced.

CARING FOR HOUSE PLANTS

The fundamental needs for house plants to make growth and maintain health are light, heat, air, moisture and food. With fewer day light hours and changing environment many of our house plants are losing their lustrous summer appearance. At this time of year a little extra care is needed to keep them in condition. To allow the plants to get as much light as possible it is suggested placing plants in a during the winter is too high for that though light is insufficient, the temperature of our homes during the winter is too high for best plant growth. The ideal temperature for most house plants is 50 to 65 degrees. This is too cold for human comfort, but if the temperature is lowered at night the plants are not likely to suffer unduly. Another difficulty in growing house plants is the dryness of the air in our homes. Some improvement can be made by using radiator trays and evaporating pans to increase the humidity of the air about the plants. Of course plants should be given a good general watering as needed, usually once or twice a week.

The word "credit" is very flexible in its meaning. Primarily it refers to the facilities for loans made possible by the accumulation of capital. Not the banks, but the people themselves bring the force of capital that goes to build homes and cities. Your dollar can not do much good by itself towards bigger operations, but when amassed with the hundreds and thousands of dollars of your fellow citizens and dispensed through conservative channels, it becomes a part and parcel of the great financial force that turns the wheels of industry and commerce. Thus when you save a dollar, and stake it where it can keep on working, you actually have invested that dollar for community good, besides added to your own independence and protection. This is no argument or reason, of course, for the saving of money to the detriment of making purchases for sustenance, or enjoyment of life, or even for the lighter things for consumption and amusement; for

strictly speaking, the miser is the only fellow who puts money where it does no one any possible good. It is rather that you may be able to accumulate sufficient means to afford the luxuries as well as the comforts, to which every human being on this mundane sphere is entitled. It is that you may draw up your storehouse for individual and family needs, just

as a community or the needs of capital draws upon your dollar through the financial institution to supply or to enlarge its needs. Along with crops, health and production, the market of money, that is, whether money is tight or otherwise, gauges the prosperity of the country and likewise plays an important part in the community development.

Less safe than any asp or viper. is a worn out windshield wiper!

Suppose you're riding along with a beat-up windshield wiper blade. Bango, along comes rain or snow. And then where are you? Standing out in the rain or snow, mostly, trying to wipe off the windshield enough so you can see. Or, if you insist on driving, you're just as likely as not to get your block knocked off. Isn't that silly? You should've fixed your windshield wiper.

Profitable egg production depends on care of pullets

Profitable egg production depends to a large degree on the care the pullets receive in the fall. From range to laying house is a big change for them.

Ventilation is of utmost importance. Pullets just moved in from the range require plenty of fresh air and yet they must be able to get away from drafts. Avoid any sudden or extreme changes of temperature, advises Robert H. McMillan, Poultry Commissioner, Alberta Department of Agriculture.

Vices such as feather picking or cannibalism can be avoided by good management. Provision of ample feed and feed trough space and plenty of clean fresh water will do much to discourage this vice. Above all, avoid overcrowding the pullets. They require 3-3½ square feet of floor space, depending on breed and the shape of the house.

Different routines may be employed in feeding birds for egg production. Some poultrymen prefer to feed practically all the grain at night, while others feed it two or more times a day. It may be fed in hoppers or on the litter, depending on personal preference or custom. A method that gives good results and that seems to be adapted to a particular case should only be changed for very good reasons. A rule of the thumb estimate is to feed all the grain the birds will consume in thirty minutes at night and one-third of this amount in the morning. In this manner, the poultryman can feed his birds according to their production. The exact amount of grain to be fed depends upon the condition of the birds as well as the production. Scratch and mash are usually included in equal amounts.

Leghorn pullets will gain about a pound in weight during their first year of laying, while the increase in weight of heavies is likely to be nearer 1½ to 1½ pounds. Most of this gain in weight comes in the first six months or so after laying starts. This means that pullets have not only to gain this weight but to make a lot of eggs, too. It takes heavy feed consumption to do this.

21-Gun salute for Queen Mother at Ottawa

Two military bands, a 100-man guard of honor and a 21-gun artillery salute greeted Queen Elizabeth on her arrival at Uplands Airport, Ottawa.

Her Majesty arrived in Ottawa by air from Williamsburg, N.Y., for a five-day visit. As she stepped from the plane the early darkness of an autumn evening was shattered by a 21-gun Royal salute fired by members of Ottawa's 30th Field Regiment, RCA, commanded by Lt.-Col. Des Callaghan.

Awaiting the Queen Mother's inspection was a guard of honor of 100 members of The Black Watch (Royal Highland Regiment) of Canada based at Aldershot, N.S. Guard commander was Major K. E. R. Moffat, of Toronto.

Music throughout the welcoming ceremonies at the airport was provided by the pipe and drum band of the Black Watch and by the regimental band of The Royal Canadian Regiment, London, Ont.

The ceremonies were repeated November 17 when Her Majesty left Ottawa.

BACKACHE May be Warning

Backache is often caused by lazy kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest or that tired-out and heavy-headed feeling may soon follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Get Dodd's Kidney Pills now.

PINEX cough syrup Concentrate

INSTANT RELIEF FROM COUGHS

due to colds

The active ingredients of time-tested Pinex cough syrup bring fast, welcome relief from distressing coughs. You save money too when you buy Pinex Concentrate. A bottle mixes with honey or syrup to make 16 ounces of pleasant-tasting cough medicine that's good for the whole family. Keep it ready for the very first sign of a cough.

Symphony orchestra for cathedrals

A permanent professional symphony orchestra has recently been formed to provide concerts in the south and west of England and in South Wales. Known as the Bournemouth Symphony Orchestra, it will be maintained by the recently-formed Western Orchestral Society Limited, of which Sir Arthur Bliss, Master of the Queen's Music, has become president. Owing to the lack of adequate concert halls in some towns and cities, certain concerts will be given in the historic cathedrals of the west of England.

These amusing cutting boards and coasters will be the talk of any party. And there are a dozen and one practical daily uses for them. Hang them on the kitchen wall or slide them in at the end of the bread box where they will be handy. The long ears of the bunny and the tail of the fish and the pig make a good handle when they are used for serving. The coasters are big enough to double as hot dish mats. To get a copy of this pattern enclose 35c with name and address and ask for number 217. This pattern is included in the Kitchen Handles Packet of patterns for making a variety of useful kitchen gadgets, price \$1.50. If for any reason you do not find these patterns useful to you they may be returned for immediate refund.

This festive tablecloth was made of percale sheeting. As it is sold by the yard a cloth for the largest table may be made by simply repeating the red and green holly designs as often as needed. The pattern carries directions on how to use fabric paints and gives printed outlines of the designs to be cut out and used as stencils. The angelic figures lined up in front of the candles are made by tracing them on stiff paper, filling in the colors and shaping to stand six inches high. This pattern is 320 and the tablecloth is 249. These numbers are available at 35c each from the address given below. Also both 249 and 320 are included in the Christmas Decorations Packet of five standard size patterns for \$1.50.

The effect of factory noise on workers' hearing is becoming a major industrial hazard, according to experts who recently addressed the National Safety Congress in Chicago, Ill.

Canadian statistics report

(A Weekly Review)

Minerals—Coal production continued to drop in September, averaged 6 percent under last year in the first three quarters of 1954. Landed imports were down 16 percent in September, 23 percent in the first 9 months. Gold production increased in August for the fourth straight month, but January-April losses put the 8-month output slightly below last year. Iron ore shipments jumped 27 percent in August, the first increase since January, brought the 8-month tally to 12 percent below last year. Also showing August production boosts: asbestos, cement, copper, lead, nickel, salt, silver.

Food—Nine percent more wheat flour, 6 percent more eggs, 27 percent more lard, 22 percent more margarine and 20 percent more salad and cooking oils were produced in September than in the same month last year. The September sea-fish catch was 3 percent larger, 47 percent more valuable than last year. Pacific fishermen caught over 40 times as much sockeye salmon as in 1953, chalked up the most valuable September catch in history. Although 8 percent more acres were planted to hops this year, the crop was 4 percent smaller, 7 percent less valuable than in 1953.

Prices—Lower quotations for a number of vegetable products ranging from coffee and onions to livestock feeds and oils were mainly responsible for an overall dip of 0.2 percent in wholesale prices in September. Compared with last year prices averaged 3 percent lower this September. Farm product prices fell 1.8 percent as both field and animal products brought less at terminal markets. Increases in plumbing fixtures and several other items raised building material prices 0.2 percent.

Labor—Moderate expansion in logging, manufacturing and construction during August sparked a slight increase of 0.2 percent in overall employment in industry at the start of September despite a dip in mining employment, notably in Nova Scotia. At the end of September there were 187,745 on the live unemployment insurance register, 2 percent less than at the close of August but 57 percent more than a year earlier, when the labor force was considerably smaller.

Trade—Reduced purchases from the United Kingdom, the United States, and Latin America cut commodity imports nearly 3 percent in August, over 8 percent in the first 8 months. Imports from other areas were up from last year in both periods. Trade in outstanding securities between Canada and other countries was over twice as heavy as last year in August. Canada ended the month with a net export of capital, the first since August last year.

HIGH RESOLVE

I'll hold my candle high, and then, Perhaps I'll see the hearts of men Above the sordidness of life— Beyond the misunderstandings, strife.

Though many deeds that others do Seem foolish and sinful too, Were I to take another's place, I could not fill it with such grace. And who am I to criticize What I perceive with my dull eyes?

I'll hold my candle high, and then, Perhaps I'll see the hearts of men.

Waste Not — Want Not

PILES that Itch and Burn

If you now suffer from the itching soreness and burning pain of piles you can be helped. Just get a package of Hem-Roid, an internal pile treatment, at any drug store and use as directed. You will be pleased at how quickly your pile trouble is relieved. Only \$1.59 for the big 60 tablet package. If you are not 100% pleased after using Hem-Roid 2 or 3 days, as a test, ask for your money back. Refund agreement by all drug stores.

PEGGY

DAD PAYS "BAR" BILL — Youngsters who visit this Frankfurt, Germany toy store are always welcome at the bar—the doll bar. The "bartender" will always set 'em up, and the children can play to their heart's content. Only catch is that Dad must pay for any specialty the children want to keep.

Brimful of thrifty gift ideas... our Alice Brooks Needlecraft Catalog... 82 of the most popular embroidery, crochet, sewing, color-transfer designs to send for. Plus 4 patterns printed in book. Send 25 cents for your copy. Ideas for gifts, bazaars, fashions.

RCAF musicians to return to Canada

Four members of the Royal Canadian Air Force will sail for Canada early in January, after two years of study at the Royal Air Force School of Music at Uxbridge, England. All four are enthusiastic about the excellent training they received in Britain and the amount of instruction they were given in such a comparatively short period. The men are: Warrant Officer Ted Robbins, 34 of Toronto, Flt. Sgt. J. Howard Woods, 33, of Vancouver, Flt. Sgt. Wilfred V. Boyce, of Richmond Hill, Ontario, and Sgt. Horace Beard, 38 of St. Catharines, Ont.

Good advice for homemakers in making Christmas cake

Many homemakers have already made their Christmas fruit cake. Aging or ripening improves the flavor and if it is stored in a good cool place the earlier it is made the better.

rich dark fruit cakes which should always be made prior to one month before Christmas. White fruit cakes or cakes with a lesser amount of fruit should be made closer to Christmas.

Be sure to use good quality ingredients in your fruit cake, advises Miss Joyce Lewis, Nutrition Specialist, Alberta Department of Agriculture. Do not use raisins or currants that show any sign of mold. Dried fruits do not contain mold spores which may not be destroyed in the baking of the cake. It is also a wise idea to scald seedless raisins and currants before using them, she says. Let them stand in boiling water a minute, then drain and spread on a tray covered with absorbent cloth or paper to remove excess moisture.

Incidentally — a tip to the new bride — you do not need to pick your currants over one by one. Wash in an abundant supply of water and any which should be removed will rise to the top.

Glaze or candied fruits that have dried out from standing may be softened by placing them in a sieve and steaming over boiling water.

If your recipe calls for mincemeat be sure the mincemeat is not too moist. Some commercial mincemeats are quite juicy. Drain off the juice and use it as part of the liquid called for in the recipe.

Be sure to dredge your fruits

and nuts with flour. Use for this some of the flour required in the recipe. The coating of flour keeps them from sinking to the bottom of the cake. If additional flour is used the cake will be dry.

Always bake your fruit cake in a slow oven. Grease cake tins and line with four layers of heavy waxed paper or three layers of brown paper. Grease again. If your cake has a tendency to burn on the bottom place the cake tin on a cookie sheet which has been covered with layer of salt.

Fruit cake should be stored in a closely covered container in a cool place. Wash, scald and cool container thoroughly before putting the cake in it. A scoop of brown sugar or an apple placed in the container with the cake will help to keep it moist.

Novel Christmas tree holder

A novel Christmas tree holder will make decorating a much easier job this year, says The Financial Post. It's composed of two main parts — a rust-proof cup (into which the tree trunk is inserted) and a tripod base which is said to offer unusually sturdy support. Since the cup is removable and not fastened to the stand it can be rotated within the stand. The tree, when it is in the holder, can then be revolved as decorations are being applied. The entire unit can be folded down to a compact size for space saving storage.

Jane Ashley Says

"Try my favorite recipe for the month"

RAISIN PIE

- 2 tablespoons granulated sugar
- 2 tablespoons BENSON'S or CANADA Corn Starch
- ½ teaspoon salt
- 2 teaspoons grated lemon rind
- ½ cup CROWN BRAND Corn Syrup
- 2 tablespoons lemon juice
- 1 cup water
- 2 cups raisins
- 2 tablespoons melted butter
- 1 recipe pastry

MIX sugar, BENSON'S or CANADA Corn Starch, salt and lemon rind in saucepan.

ADD CROWN BRAND Corn Syrup and juice; mix well.

ADD water gradually; stir in raisins.

COOK over medium heat; stir constantly, until mixture thickens and boils.

REMOVE from heat, add butter; cool.

PREPARE pastry; line 9-inch pie pan with ½ the pastry rolled ⅛ inch thick.

FILL with raisin mixture.

ROLL out remaining pastry for top crust; make several slits for steam to escape.

PLACE crust over raisins; seal, flute edge.

BAKE in hot oven (425°F.) 30 to 35 minutes or until crust is browned.

OUR COMPLETE SHORT STORY—

Safe in your heart

—By ANNA E. WILSON

EPH MILLER put the finishing touches to his neat hedge, and stopped to listen to Mannie Bell calling her small son, Lonnie. Lonnie was safe enough in the care of her married sister, Carol, but Mannie couldn't seem to rest when Lonnie was out of her sight. Eph thought that it was too bad that Mannie didn't know what Gwendolyn Baker had so painfully found out. Gwendolyn had put it this way: you don't need to be near the people you love to possess them, if you have them safe in your heart.

It seemed only yesterday that he had been cutting the Baker hedge and stopped to listen to the hurt tones of Gwendolyn. "Of course, Randy, if you'd rather go alone." He had almost dropped the shears at Randy's brusque, "Now there's no need for you to go down town in all this heat, mother." Then the slam of the car door as Randy moved out of the driveway. Somehow, it made Eph think of Molly.

Folks had been surprised when Molly left Randy and went to live with her brother. The Baker house was by far the best in Onesville, and everybody knew that Mrs. Baker adored her daughter-in-law. Everybody had been surprised, that is, but Eph. Eph knew that Molly had come to think that she and Randy should have a life of their own; had grown tired of the tears and hysterics by which pretty, spoiled Gwendolyn Baker ruled Randy and Randy's home.

Molly was plump, red-haired and pretty; loved sunshine and fresh air, looking forward always into the future. Part of Gwendolyn's power over Randy lay in her hold on the past. Randy's father had died when Randy was a child

and Gwendolyn had promptly set up the Grey Room. The Grey Room had been Mr. Baker's study and Gwendolyn kept it as a shrine to his memory, letting no one dust it but herself and putting fresh flowers daily before the large framed picture of Randy's dad.

Molly hated the room. The stuffed moose's head over the mantel gave her the creeps. She never felt safe with the rows of guns in racks along the walls. She hated the picture of Randy's dad and the feeling of misery and depression that the room seemed to give to the whole house. "Randy," she cried out one day, "your father was never like that. Dad says he wasn't. Why—it's—it's a kind of sacrilege." But Molly had been unable to overcome the influence of Gwendolyn and she moved out.

Eph had remembered how Randy had gone about the place trying to look as if he didn't care when Molly left. How, at last, he'd begun to grow irritable, to avoid the house and to play golf more and more at the club. He no longer noticed when Gwendolyn refused to eat her dinner and he played chess for hours with old Mr. Covey, who had been a friend of his dad's.

It seemed, Eph told himself now, as if Randy had been trying to get to know his father by talking to his old friends and reading his books, visiting the Boy's Club and the Civic Monument. It wasn't until Mrs. Baker took to her bed with a feigned attack of influenza that Randy began to act at last.

Eph had trimmed the box elder and was just getting his shears in the black mulberry when he heard a yell, and looked up to see Gwendolyn frantically waving away a couple of men who had backed a big van up to the front door and were busy carrying away the sacred moose. She was still babbling when Randy appeared with an armful of guns, and the picture of his father.

"Now, mother," Randy's voice was brusque, "there's no need to carry on. The museum's a better place for the moose's head, especially since Dad didn't shoot it. Dad couldn't have hurt a fly. And the proper place for the guns is down at the Hunt Club." Then as Gwendolyn dissolved in tears, he added gently, "Besides, Mother, there are better things to remember Dad by than a lot of fakes. Mr. Covey tells me that Dad was responsible for the Civic Monument and that he built the Boy's Hall."

It was only when an army of plasterers and carpenters moved in that Gwendolyn gave up and went to stay with her brother. Eph had been called into helping with the plastering and was still there when Randy got a call from the hospital and rushed out.

Eph hoped that Gwendolyn had broken a leg, but he had to leave to visit his married sister in the country and only arrived back in time to see Randy helping his mother out of the local taxi with all her bags.

Eph helped Randy carry them up. He was just behind them when Randy steered his mother towards the Grey Room and opened the door. The windows were gay with bright curtains and the whole room had been painted a pale rose to form a background for a be-ribboned, satin-lined bassinet. Sitting beside it, bright and rosy, was Molly, feeding her small son. "You see, mother," Randy's voice was soft, "Molly and I've been thinking that the very best memorial for Dad is a little grandson."

And even Eph could hear the tremor in Randy's voice when he continued, "It's not you and me anymore, Mother. It's not even Molly and me; it's the two of us doing our best for him. That's natural."

Eph took the bags on into Mrs. Baker's room and went back to trimming the shrubbery. It must have been a full six weeks later when Randy called him in to fix the kitchen tap. Molly and Randy were having breakfast in the small annex off the kitchen, and Eph thought Molly looked lovely in soft rose with that happy look in her eyes, pouring coffee for Randy. It was Randy who read the letter from Gwendolyn.

Dear Randy: Your Uncle Jim is ailing and the doctor says he won't be better for a long time. I've decided to live here and look after him. You see, Randy, I've discovered that you don't need to be near the people you love to possess them, if you have them safe in your heart.

(Copyright Wheeler Newspaper Syndicate)

GREAT RIFT VALLEY

Most of the great African lakes are situated in the Great Rift valley, a depression extending from Palestine in Asia to the southern end of Lake Tanganyika in central Africa.

Jubilee theme for Saskatchewan at Winter Fair

REGINA. — Saskatchewan's Golden Jubilee—1955, is the predominant theme of the Saskatchewan display at the Royal Agricultural Winter Fair, according to E. W. McKenzie, supervisor of visual aids, Saskatchewan department of Agriculture.

This colorful display, which has an overall length of 35 feet, consists of a series of panels designed in such a way that admatic, continuous projectors will vividly portray Saskatchewan progress and prairie scenes, especially chosen to give Fair visitors first-hand knowledge of rural life and opportunities in this prairie province.

The effectiveness of the display is enhanced by the use of ten translucent pictures, in full color, depicting Saskatchewan farm activities and beauty spots ranging from waterfalls in the North, to wooded pathways in the Cypress Hills.

The final panel is built to resemble a stockade, in front of which is placed an authentic Red River cart as a reminder of the early history of the West. This panel also contains two enlarged pictures portraying activity at old Fort Walsh and life on a Saskatchewan ranch.

The entire exhibit was designed, built and assembled by the Saskatchewan department of Agriculture, under the direction of Mr. McKenzie, who will be in charge of the display while it is in Toronto.

Funny and Otherwise

With his usual long windedness, the bore was describing one of his miraculous escapes.

"There was I," he said, "on a lonely road, miles from anywhere, with a blazing car. What do you think I did?"

One weary listener stifled his yawns long enough to reply: "Took a long breath and blew it out."

A depressed-looking fellow strolled into a restaurant. A waiter bustled up.

"What will you have, sir? Some cold shoulder?"

"No, thanks; I had that this morning."

"Well, then, tongue, sir?"

"No, thanks; I'll get that tonight."

Going to the office with Brown every morning, Smith noticed that he raised his hat to Dr. Blunt, the family doctor, whom they met on his rounds.

"Why do you raise your hat?" asked Smith.

"Because my wife always does what he tells her," replied Brown.

The psychologist was explaining how easy it was to judge a man's character from his clothes. "Socks show man's temperament very clearly," he said. "They tell whether he is generous or avaricious, nervous or phlegmatic."

"They also keep his feet warm," muttered an unbeliever.

Calgary team wins shooting match

Calgary has won the Commonwealth cities match sponsored by the British National Small Bore Rifle Association. Their team of 30 scored 2,975 points—only five points below the record set up last year by London, England. The runner-up this year was London, England, followed by Edinburgh with Montreal in fourth place. Toronto and Winnipeg also competed. A total of 17 Commonwealth cities competed in the match which is regarded as the most important inter-cities match in the small bore shooting calendar.

People tend to be taller the farther away from the tropics they live.

THE TILLERS

New Manitoba C of C Officers

New officers of the Manitoba Chambers of Commerce were elected at Dauphin at the annual meeting held there recently.

From left to right they are: M. J. G. McMullen, 211 Confederation Building, Winnipeg, managing secretary; B. R. Wolfe, Transcona, second vice president; W. H. Watson, Winnipeg, president; W. G. Powne, Melita, first vice president; F. J. Scott, St. James, third vice president.

One of the outstanding features of the convention was the symposium on different phases of Manitoba industrial development conducted by a panel of experts. J. G. Cowan, deputy minister of

Mines and Natural Resources; M. G. Smerchanski, geologist; R. H. G. Bonnycastle, industrial prospects; Walter J. MacDonald, chartered accountant. Other speakers were G. S. Thorvaldson, Q.C., Hon. J. W. Pickersgill, Thomas Smith and D. M. Stephens, chairman, Manitoba Hydro Electric Board.

207 delegates, from 55 of the 80 member chambers were registered. Outstanding in the minds of the delegates was the completeness of the arrangements made by the Dauphin chamber of commerce for the most successful convention in the chamber's 24 year history.

Unveil monument western explorer

CASTLEGAR, B.C.—One of the famous exploits of David Thompson, early Western explorer and geographer, was commemorated with the unveiling of a cutstone monument on a spot overlooking the Columbia River.

More than 250 persons attended the dedication ceremony performed by Rt. Rev. F. P. Clark, bishop of the Kootenay, on a spot beside the Columbia where Thompson is known to have passed September 5, 1811, on his historic descent of the river from its source to its mouth.

H. W. Herridge, MP for Kootenay West, and Dr. W. N. Sage, provincial representative of the Historic Sites and Monuments

Board of Canada, lauded Thompson for his contribution.

A copy of Thompson's early map of the Columbia was displayed at the unveiling.

Other monuments to Thompson's explorations already stand near Invermere, B.C., and at Jasper, Alta. He died at Longueuil, near Montreal, in 1857.

Selkirk wheat seed selling \$3 to \$4 bushel

The Manitoba department of Agriculture will co-operate closely with the Dominion laboratory of cereal breeding in the distribution of Selkirk wheat, it has been announced by J. R. Bell, deputy minister of the department.

Farmers who did not purchase any of the new rust resistant variety of wheat in the spring of 1954 will find order forms available at the office of their local agricultural representative, he said. As any surplus in the province will be needed by Saskatchewan, Manitoba farmers are being urged to get their supplies as soon as possible.

Approximately 1,800,000 bushels of commercial Selkirk were produced in Manitoba this year. A survey by agricultural representatives indicates that there will be enough Selkirk to go around in most areas, with a few reporting a surplus and others a shortage.

Mr. Bell expressed the hope that the commercial Selkirk, at present being held a surplus on many farms would find a ready market in those and adjacent areas. Agricultural representatives, he said, are acting as contacts for those who wish to purchase seed and have been compiling lists of those with surplus stocks for sale.

Under Wheat Board regulations, the deputy noted, Selkirk could move on a farm to farm basis without any restrictions, but not for resale. Farmers may also clean up their seed and then obtain a control sample certificate from the plant products division, Canada department of Agriculture, and advertise 'surplus as seed for sale.'

Commercial Selkirk is moving at many country points at a price of \$3.00 to \$4.00 per bushel, Mr. Bell said.

To stick your tongue out and hiss is considered an extremely polite way to greet a person by Tibetans.

Now Many Wear FALSE TEETH With More Comfort

PASTETHS, a pleasant alkaline (non-acid) powder, holds false teeth more firmly. To eat and talk in more comfort, just sprinkle a little PASTETHS on your plates. No gummy, gooey, pasty taste or feeling. Checks "plate odor" (denture breath). Get PASTETHS at any drug counter.

Itch...Itch...I Was Nearly Crazy

Very first use of soothing, cooling liquid D. D. D. Prescription positively relieves raw red itch—caused by eczema, rashes, scalp irritation, chafing—other itches. Greaseless, stainless. 39¢ trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D. D. D. PRESCRIPTION.

HERE AND THERE

Mr. and Mrs. W. Cook have moved into their new home which they purchased from G. Larson. For the past several days carpenters have been busy working in the interior getting the house ready for winter.

Arrowwood people are building a fine new community hall and when it is finished they will have something to be proud of. This is something Arrowwood has needed for many years.

The editor of this paper appreciates the friends who bring or send in news whenever possible and those who lend us their assistance to that end, have our unbounded gratitude.

L. F. Hedberg, the local accountant, auditor and income tax consultant suggests that you bring your books and vouchers to him so that your income tax return may be correctly written up. Mr. Hedberg's office is in the Pioneer Meat Market block.

XMAS TREES—All sizes for sale. Orders taken by Mrs. Stott, Phone 77, Gleichen.

The first airplane flight across Canada was in 1920.

Annual Meeting Wheat Pool

At the annual meeting of the seventy elected delegates of the Alberta Wheat Pool held last week it was reported that the surplus for the business year ending July 31 was \$2,448,166. That was a decline of \$242,631 from the surplus in the preceding year.

Handlings of Alberta Pool Elevators at 56,196,415 bushels were down about 23,500,000 bushels from the previous year due to grain congestion and the method used in distributing railway cars. In their reports, both the board of directors and the manager of the Wheat Pool, A. T. Baker, protested that the system of car distribution is unfair to the Wheat Pool as it prevents Pool members from using their own facilities to the fullest degree.

During the business year in review the Alberta Wheat Pool distributed \$2,459,099 in patronage dividends involving a cash distribution to member patrons of Pool Elevators of \$587,093, and distributed reserve credits of \$1,908,006.

Since the Alberta Wheat Pool was organized it has paid out \$3,256,155 in cash patronage dividends and has purchased reserves from the membership totalling \$9,122,307. Last year alone such reserve purchases totalled \$500,572 to members who have ceased farming and to the estates of those who have passed away.

During the past year 2,314 new members joined the Alberta Wheat Pool.

As at July 31, 1954, the Alberta Wheat Pool owned 507 country elevators, two terminals, 397 dwellings, 42 coal and flour sheds and 505 country annexes.

The members' equity in the fixed assets and working capital totalled \$11,408,922, equal to 128.2 percent of outstanding reserves.

Until Canada has a much larger population, the country will always produce less per worker than the United States; and similarly will have less with which to pay for production.

WHAT DOES ECONOMIC AFFAIRS DO IN ALBERTA

The Department of Economic Affairs works for the betterment of economic, cultural and social conditions within the province of Alberta. The efforts of all nine branches of the Department are combined toward this objective.

All branches of public service have a direct bearing upon the welfare and progress of the people generally, but two of the closer relationships with the economic progress of Alberta are maintained by the Alberta Travel Bureau and the Industrial Development Branch of the Department of Economic Affairs.

All Albertans share directly or indirectly in the benefits of our tourist trade and in the orderly development of our rich resources. The tourist industry and industrial growth mean greater prosperity for everyone. New money comes into the province and production of essential goods is increased. We learn more about others, and they about us, and better relationships follow.

The tourist trade of Alberta is big business. Each year about one and one half million people spend their holidays at Alberta's famed resorts.

Conservative estimates indicate tourists spend \$35,000,000 a year in Alberta. This money goes into the pockets of merchants, service station and garage operators, hotel, and auto court proprietors, farmers, and all producers of human necessities.

The beauties of Alberta are the star attractions; the produce and services of the people of Alberta are our stock in trade; and the tourists are our customers.

The Alberta Travel Bureau helps create the necessary desire among our neighbors to visit the Province, but it remains the privilege of every Albertan to give our guests a warm welcome, to see that they enjoy their stay and to encourage them to come again.

The Industrial Development Branch also encourages the growth of interest in Alberta. Every effort is made to attract attention to industrial opportunities provided by the Province among business men and industrialists from far and near. Closest attention is given to all inquiries.

Sponsored by the Branch, an Industrial Development Board has been operating for several years. This Board consists of the Deputy Minister of Economic Affairs, the Director of Industrial Development and the Industrial Commissioners and representatives of each Alberta city. The Board holds meetings each year at various locations within the Province to which local business men and representatives of the railways and banks are invited. On these occasions the development of the Province as a whole is discussed and programs for concerted action towards great development are formulated.

Activities such as these are playing an important part in Alberta's industrial expansion. In 1953 more than \$38,000,000 was invested in new industrial plants, new additions to established plants and new warehouses. That same year, the value of production from all Alberta's manufacturing industries exceeded \$587,000,000. New plants are opening up and new industries are being established in Alberta with impressive regularity; but impressive as our industrial development has been over the past few years, still greater development for the future is evident.

GOVERNMENT OF THE PROVINCE OF ALBERTA

We bring you -

THE 1955 BUICK

New thriller in Style -

Power-Performance

A BRIGHT NEW FRESHNESS greets your eyes and tells you: *Buick's done it again.*

You see it in the bold distinction of that gleaming Wide-Screen Grille. You see it in the rakish sweep of the rear-end contours. You see it in the whole fore-and-aft newness of fleet-lined grace that marks Buick the beauty thrill of 1955.

New horsepower—up to 236

You learn more when you get the power story. Up to new peaks go the horsepower of every Buick V8 engine—a wallowing 188 h.p. in the low-price SPECIAL—a mighty 236 h.p. in the CENTURY, SUPER and ROADMASTER.

And it's new, more responsive, far abler power you can literally feel as you go.

But even bigger Buick news for 1955 is some-

thing more than style and power. It's what the "variable pitch propeller" now had done for Dynaflo Drive.

Up goes performance—and gas mileage too

When you find it necessary to push the pedal to the floor board, you do more than call on the greatest high-compression V8 power in Buick history.

You do what a pilot does when he heads his plane down a runway.

You do in oil what he does in air—you cut down take-off time by using "variable pitch propellers."

In this case, the propeller blades are inside the Dynaflo unit. But they're engineered to swivel or change their "pitch" just like plane propellers

—and with the same result: one pitch for get-away, another pitch for gas-saving fuel efficiency. And what you get in the way of instantaneous safety—surge with absolute smoothness, you can only believe when you feel it.

This you have to try

Of course, we want you to come and see the trend-setting new Buicks—look into the betterments in gasoline mileage that add new thrills to these spectacular cars.

But this year, "seeing" is only the beginning. So—join the crowds viewing the new Buicks, and make a date to get behind the wheel as soon as we can have a demonstrator available. We promise you the thrill of the year.

*Standard on ROADMASTER, optional at extra cost on other Series.
